The UK's **finest natural** looking artificial garden grass

Our products are manufactured by a technologically advanced system to produce the most natural looking artificial garden grass available in the United Kingdom.

EverLawn® has rapidly become the preferred option for garden enhancement and our customers immediately appreciate the advantage of life without mowing, edging, raking, spiking, feeding and weeding.

Lawn Problems

Lush green lawns are a delight in any garden but other priorities distract us from the time and effort needed to achieve such results. Very often when the opportunity to tend the lawn arises the weather is unobliging and the problems of pests, disease, poor drainage, moss, weeds and bald patches accumulate.

Consider the EverLawn® Solution

EverLawn® is the UK's finest and most natural looking artificial garden grass and will provide you with a maintenance free, durable relaxing lawn area for the whole family to enjoy throughout each season, year after year.

EverLawn® Advantages

Once installed, **EverLawn®** is practical, child, pet and adult friendly. Concerns regarding maintenance and environmental issues relating to chemical compounds, energy supplies, flooding and water supplies are of no consequence.

The initial appropriate drainage measures eliminate flooding of the lawn area which, regardless of adverse weather is, of course, mud and fade free.

The UK's finest natural looking artificial garden grass is available from **EverLawn®**.

The UK's largest importers and leading suppliers of artificial garden grass to the domestic market, garden centres and landscape merchants.

UV resistant

Quick drainage

No more burnt patches

No more muddy feet or paws

Where can **EverLawn®** be installed?

EverLawn® is designed to be installed onto most surfaces.

Concrete

Most gardens have a concreted area that replaced the lawn years ago, and in most cases was because of the demands of maintenance. We can offer you **EverLawn®** artificial grass products that can be installed over the concrete with minimal preparation work

Flagging

By adopting the same method as concrete we can offer you **EverLawn®** artificial grass products that can be fitted over a flagged area with minimal preparation work.

Over Decking

Most decking gets very little sun and can become treacherous when damp. We can offer you **EverLawn®** artificial grass products that can be fitted over decking. The installation time is short and results in an instant garden to walk in and out of your home without the muddy feet.

Replacing the lawn

Replacing your lawn with **EverLawn®** not only has an everlasting visual impact but instantly removes all the concerns with badly worn lawns, muddy feet and maintenance issues. When you have an artificial grass surface installed, this instantly enhances the quality of your life and those around you.

Driveways

Most drives are completely covered in paving, tarmac or plain old concrete. We can offer you **EverLawn®** artificial grass products that can be installed over your drive leaving only the area the wheels come into contact with the drive. The visual impact is amazing. More and more people are replacing the grey look and adopting the green drive approach.

Balconies & rooftops

EverLawn® artificial grass products are perfect for balconies and roof tops. With a very simple installation you can have a lush, soft, green grass underfoot, instantly improving aesthetics and texture.

Around the swimming pool

The natural colour of our **EverLawn®** artificial grass products will compliment the aquatic blue of your swimming pool. Whether your pool is inside or outside there is virtually no maintenance so leaving more time for you to relax

A useful guide for **Installation**
